### Comments

*The SSG Bucktail fly aka. "the Triple odd Bucktail" is a very good fly pattern for fly fishing for Coho Salmon and Chum Salmon in the Streams and Rivers of the Pacific Northwest. Coho and Chum Salmon find this pattern irresistible and it can also irritate them at the same time. It is a simple swing and strip pattern used on a sinking tip Fly line with a sink rate of type 3. Use a leader length between 6' – 9' of 15 LB tippet and this fly will produce both Chum and Coho Salmon. The reason we called this Fly pattern the SSG Bucktail, for the simple comparison to a shotgun shell. Once this Bucktail fly is thrown at the river, it hits everything!*
